HD-302 EPOXY HARDENER

HD-302 Epoxy Hardener 220 kg

A) General Description

LS-D302 is a modified polyether amine curing agent with transparent color and fast curing. It hashighresistance to water, moisture and whitening. Its curing film is with good color stability, highhardness, highgloss and strong adhesions. 1. Characteristics

1) Fast curing
2) Transparent color
3) High gloss
4) High hardness

B) Applications

1) Epoxy color sand floor coating
2) Self-leveling and rubber floor coating

C) Storage Life

At least 12 months from the date of manufacture in the original sealed containers. Store away from excessive heat and humidity in tightly closed

D) Handling Precautions

Refer to the Material Safety Data Sheet

E) Additional Properties

Lütfen iletişime geçiniz.
